## PROJECTS

**Canadian COVID19 Tracker** — Tech Stack: *Angular, TypeScript, Semantic UI*

October 2021 - November 2021 | [Visit Site](#)

A comprehensive Canadian COVID-19 tracking website. It features data visualization allowing for individual tracking or comparisons (between provinces) of confirmed cases, recovered cases, active cases, and deaths. The web app also features the latest data from COVID-19 Canada Open Data Working Group. UI developed using Angular and TypeScript. Hosted on Netlify.

**Budget App** — Tech Stack: *Angular, TypeScript, Bulma*

September 2021 | [Visit Site](#)

A simple budgeting web application that allows users to track and organize their expenses and income by categories. Learned the basics of Angular components, and project structure while developing the UI. Also learned the basics of TypeScript such as interfaces, inheritance and classes.
