EXPERIENCE

Ontario Power Generation — Template Specialist | IM Applications & Innovation

04/2022 - Present | Pickering, ON, Canada

- Upgraded departments workflow by digitizing physical paper forms, converting documents into responsive web applications using Figma, Microsoft Power Apps, Power Automate and SharePoint List.
- Assisted internal OPG teams with template UI complications by breaking down clients situation and dissecting their documents backend using Microsoft Visual Basic for Applications.
- Built company wide document templates that align with OPG's brand styling using Figma, Microsoft Office and Visual Basic for Applications.

Royal Bank of Canada — Analyst, Data Stewardship | Global Procurement

03/2022 - 04/2022 | Toronto, ON, Canada

- Influenced decision making on how to invest in socially responsible vendors by modelling and visualizing diverse spend datasets leveraging Excel and Tableau.
- Enhanced data accuracy and cleanliness by implementing a new migration tool that involves process mapping and elimination of errors to ensure the department can utilize for future projects.
- Revamped department identity by designing various team logos that align with RBC's styling brand using Figma.

Royal Bank of Canada — Career Launch Associate

03/2021 - 03/2022 | Toronto, ON, Canada

Analyst, Data Stewardship - Global Procurement | 11/2021 - 03/2022

- Improved the accessibility of functional partner data by transforming formerly text based datasets into user friendly dashboard visualizations leveraging bar charts, line graphs and trend lines from Tableau and Excel.
- Optimized team workflow by consolidating and integrated major team milestones into centralized user experience using PlanView ProjectPlace.
- Enhanced UI and user experience of the Procurement connect site from end to end through wire framing, testing and integration leveraging with Figma.

Web Expansion Coordinator, United Way of Durham Region | 09/2021 - 12/2021

- Designed and developed campaign advertisement for united way's marketing initiatives using Canva and Sketch.
- Lead, interpreted campaign analytics providing insights to project leads by visualizing project expenses and donation repots using table and excel.

Credit Card Dispute Advisor | 03/2021 - 09/2021

- Assisted clients with recovering credit card dispute amounts by researching and building cases that were reviewed by credit card companies.
- Validated data from internal and third party systems that ensured appropriate course of action was pursued.
- Managed high volume of referrals and email inquiries to resolve credit card disputes.

Ferraz Creative — Junior Web Developer

09/2020 - 06/2021 | Toronto, ON, Canada

- Built production websites by collaborating with senior developer and designer on aspects of the site using PHP for WordPress, HTML/CSS/JavaScript and Figma.
- Maintained website quality assurance by implementing responsive testing to ensure the backend data and front-end interfaces reflect properly on all platforms.
- Leveraged client/insight to identify and correct issues with overall website flow.

PROJECTS

Canadian COVID19 Tracker — Angular, TypeScript, Semantic UI

A comprehensive Canadian COVID-19 tracking website. It features data visualization allowing for individual tracking or comparisons (between provinces) of confirmed cases, recovered cases, active cases, and deaths. The web app also features the latest data from COVID-19 Canada Open Data Working Group. UI developed using Angular and TypeScript.

Youtube Clone — React, Material UI, RapidAPI

A web application that clones the functionality of the original Youtube website. It features a home page video feed that is fetched from the Youtube v3 API and integrates react hooks to filter the categories and video feed. With the use of Material UI, this web app is responsive, ready to use for desktops and mobile.

Budget App — Angular, TypeScript, Bulma

A simple budgeting web application that allows users to track and organize their expenses and income by categories. Key learning include the basics of Angular components, and project structure while developing the UI, in addition to the basics of TypeScript such as interfaces, inheritance and classes.
